

FOR IMMEDIATE RELEASE

Indecomm Global Services Document Management Group Hits New High

Company Now eRecords In More Than 600 Counties

- Indecomm eRecording shows growing momentum
- Market penetration passes 600 counties
- Work driven by eRecording Expansion Team

St. Paul, MN (March 27, 2014)—Indecomm Global Services, a leader in business process outsourcing, learning, and technology solutions, announces that it offers eRecording in more than 600 counties in the United States. This level of market penetration, achieved so early in the year, is one measure of Indecomm's commitment to helping recorders offer the newest and most economical recording methods to the mortgage industry. Indecomm's other recording achievements are a guide to what the future holds. Indecomm already offers paper recording in all the jurisdictions in the United States, providing synergy with the eRecording process.

Indecomm has been steadily investing in eRecording. It has recently added over 160 counties and now reaches a total of 600 counties. While 1,061 counties offer eRecording, which represents 70% of the population, Indecomm's business now includes 600 of the largest counties, reaching over 52% of the US population.

“Indecomm plans to continue its expansion in eRecording,” said Rajan Nair, President, Financial Services Division, Indecomm Global Services. “Our economies of scale bring broad expertise and solid cost control to our clients’ business. The rapid change in the economy is reflected in the technologies changes in recording and partnering with technically astute firms can facilitate transitions to new standards.”

Indecomm provides the full spectrum of mortgage document management solutions. These range from turnkey paper and eRecording services to image-based recording quality control and walk-in recording services.

About Indecomm Global Services

Indecomm offers consulting, outsourcing, learning, and technology solutions to our clients in the financial services, hi-tech, life sciences, education, and publishing verticals.
